Product Description

ASTM Standard 304 430 2b Stainless Steel Coil Length 1000mm-12000mm

The stainless steel coil is available in a variety of grades, each with its unique composition and properties. Some of the most common grades used for stainless steel coils include SS201, SS202, SS304, SS316, SS410, SS430, etc. The choice of grade depends on the intended application, as different grades have different levels of corrosion resistance, strength, and heat resistance.
