

Smooth Flat Sheet High Strength 2B No 1 Non Magnetic Stainless Steel Metal For Industrial

Basic Information

- Place of Origin:
- Brand Name:
- Model Number:
- ShengQuan

China

201/304/304L/316/316L/321/309/310

Product Specification

Highlight:	2B Stainless Steel Metal Sheet, Non magnetic Stainless Steel Metal Sheet,
Application:	Construction/ Decoration/ Industry
Shape:	Flat.sheet
• Feature:	Smooth And Flat
Thickness:	0.5mm-20mm
Strength:	High
Magnetic Properties:	Non-magnetic
Surface:	2B No.1

Industrial Stainless Steel Metal Sheet

Product Description:

Our Stainless Steel Sheet Metal is manufactured using corrosion-resistant steel, making it a durable and long-lasting investment. It is designed to withstand harsh weather conditions and maintain its strength, even in highly corrosive environments. This makes it ideal for applications where rust and corrosion are a concern.

The surface of our Stainless Steel Sheet Metal is available in 2B and No.1 finishes, giving you the option to choose the perfect look for your project. The 2B finish is a smooth, reflective surface that is ideal for decorative applications. The No.1 finish is a rough, matter surface that is perfect for industrial applications.

Our Stainless Steel Sheet Metal has high strength properties, making it an excellent choice for heavy-duty applications. It can withstand high stress and weight, making it perfect for use in construction and industrial settings.

This Ferritic Stainless Steel Sheet Metal is flat and can be easily cut and shaped to suit your specific needs. This makes it ideal for use in a wide range of applications, including roofing, wall cladding, and fabrication.

Invest in our Corrosion Resistant Steel Sheet Metal for your next construction, decoration, or industrial project. Its high strength, durability, and corrosion-resistant properties make it a smart investment that will last for years to come.

Features:

Product Name: Austenitic Stainless Steel Sheet Metal Feature: Smooth And Flat Application: Construction/ Decoration/ Industry Strength: High Shape: Flat.sheet Surface: 2B No.1 Additional Feature: High-Temperature Stainless Steel Sheet

Technical Parameters:

Technical Parameter	Value
Product Name	Ferritic Stainless Steel Sheet Metal
Thickness	0.5mm-20mm
Magnetic Properties	Non-magnetic
Strength	High
Shape	Flat.sheet
Application	Construction/ Decoration/ Industry
Feature	Smooth And Flat
Surface	2B No.1
Product Name	Austenitic Stainless Steel Sheet Metal
Thickness	0.5mm-20mm
Magnetic Properties	Non-magnetic
Strength	High
Shape	Flat.sheet
Application	Construction/ Decoration/ Industry
Feature	Smooth And Flat
Surface	2B No.1

Applications:

Product Application Occasions

Our Stainless Steel Sheet Metal is commonly used in various industrial applications due to its high-temperature resistance and durability. It is an ideal material for manufacturing chemical processing equipment, heat exchangers, pressure vessels, and boilers. Our product is also used in the food industry for making equipment that comes into contact with food, such as storage tanks, processing equipment, and kitchen appliances. Pharmaceutical companies also use our product to manufacture equipment for drug production and storage. Product Application Scenarios

Our Stainless Steel Sheet Metal can be used in various scenarios. Due to its high strength and non-magnetic properties, it is suitable for applications where magnetism can cause interference. Our product is widely used in the construction industry for both interior and exterior applications, such as roofing, cladding, and facades. It is also used in the transportation industry for making railcars, trailers, and truck
